

Managerial Accounting

ACCT: 2200

Spring 2017

Professor Name: Roger Chope

Professor Email: roger-chope@uiowa.edu

Course Description:

Basic topics in cost behavior, measurement, accumulation; use of cost data for relevant analysis, budgeting, performance evaluation. Prerequisites: ACCT:2100 and ECON:1100 and MATH 1380.

Course Objectives:

Managerial accounting addresses information that managers use to make decisions. These decisions can involve both the future and the past. For example, decisions about the future could involve budget planning or changes in production or product strategies. Decisions looking backward could involve what action to take as the results of performance evaluation. Most of these decisions are supported at least in part by cost or other accounting information.

This course will expose you to:

1. basic terminology and methods of management accounting
2. concepts underlying current practices in management accounting
3. application of these concepts to business problems.

Class Schedule

We have been assigned to the A4 Block. A day by day schedule is attached.

Grading

Exams: There will be three exams: two midterms and a final. The format of the exams will be mostly problems, with a few short essay questions. The problems will resemble those assigned for homework, and the essays will mirror discussions we had in class. There will also be announced quizzes to help you gauge your progress in the course as we go along.

Grades: Your grade will be based on an accumulation of total points allocated approximately as follows:

Midterm #1	100
Midterm #2	100
Final Exam	100
Quizzes, etc.	<u>100</u>
Total	400

Course grades will be distributed according to the recommended guidelines of the Accounting Department at the University of Iowa, which is 25% A's, 35% B's, 30% C's and 10% D's. These are only guidelines.
